INSTRUCTIONS:

- The enterprise budget form is an accrual basis budget. While we acknowledge that a cash budget is critical to the effective operation of any organization, it is more important to know whether the enterprise is operating at a profit or loss on current year revenues and expenses in a fiscal year period. If the enterprise is required to follow the same accounting principles for determining profit or loss as a company is, it must be recognized that certain items such as bond proceeds are not revenue, they provide cash, and items such as construction and major improvements of systems are not expenses even though they use cash. Accordingly, it would be helpful for the enterprise to provide a reconciliation section provided at the bottom of the form for cash flow analysis. Net income should not reflect retained earnings.
- A separate budget should be submitted for each enterprise function, such as water and sewer. A combined budget may be prepared only if the function of the enterprise is closely related.
- Bonds to be repaid from enterprise funds should be budgeted and reported in the enterprise fund, not the debt service fund.
